

Texas Tutorials

High Expectations for All Students

Apex Learning Texas Tutorials

Apex Learning[®] Tutorials provide teachers with a solution to support all students in meeting the requirements of the State of Texas Assessment and Academic Readiness (STAAR)* exams.

With content developed specifically for the Texas Essential Knowledge and Skills (TEKS) and aligned to STAAR, Tutorials offer direct instruction, meaningful practice, and formative assessment to build the required knowledge and skills.

Key Component of Blended Learning

Whether the goal is to ensure that all students meet the requirements of the Texas and STAAR standards, facilitate accelerated instruction, provide targeted intervention and remediation, or enhance initial instruction, Apex Learning Tutorials enable teachers to differentiate instruction for an individual student, small groups, or a whole class.

The unique organization of Tutorials – Learn It, Try It, Review It, Test It – provides an instructional approach to ensure all students excel beyond expectations.

TEST IT

assesses student knowledge through randomized assessment

Student-Centered. Active Learning. Prescriptive Approach.

The instruction, assessment, and immediate feedback offer students multiple opportunities to learn by doing as they observe, inquire, create, connect, and confirm their understanding.

To focus student learning, prescriptive pretests identify which learning objectives a student has mastered and which require additional effort.

Meaningful Real-Time Data

Equip administrators, teachers, and students with real-time data to inform decision-making, maximize classroom instructional time, and accelerate student learning.

Empower Student Success

Interactive App-like Design

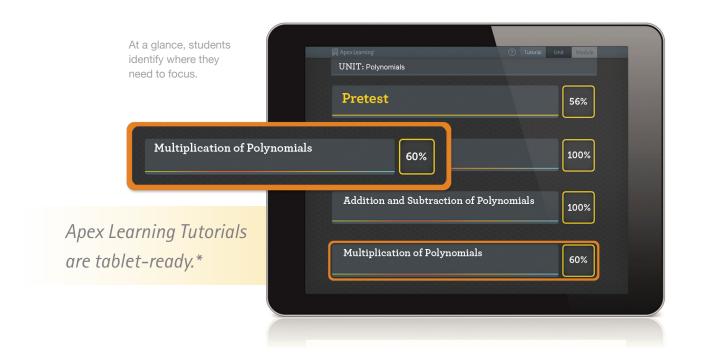

The intuitive interface engages today's tech-savvy students.

Individualized Learning Path

Students see where they are, how they are doing, and what they need to do next.

Apex Learning has changed the future of many students by giving them a second opportunity to reach their goals and to find success.

Heather Engstrom,
 Assistant Superintendent
 Kerrville Independent School District, TX

For the 2015–2016 school year, we have developed Texas Tutorials specifically for the TEKS to help prepare your students for the STAAR End–of–Course Exams.
