

DIGITAL CURRICULUM SOLUTION

Prepare students for success on the California High School Exit Exam (CAHSEE). Apex Learning CAHSEE Exam Prep is aligned to CAHSEE blueprints and designed around its unique test architecture. Available for English language arts and math, CAHSEE Exam Prep provides strategic, targeted practice with guided instructional feedback on the content standards assessed on the CASHEE.

Individualized CAHSEE Preparation

Apex Learning CAHSEE Exam Prep enables all students to make the most effective use of their study time, giving them the skills and confidence to achieve higher scores on the CASHEE.

Diagnostic tests identify areas of weakness. Formatted like the CAHSEE, the diagnostic pretest identifies the content areas where students need additional practice.

Prescriptive study plans link to targeted content. Using the diagnostic pretest results, CAHSEE Exam Prep creates individualized study plans targeting each student's distinct learning needs.

Practice questions familiarize students with the CAHSEE format. Activities are presented in the same format as on the CAHSEE enabling students to practice exam style questions and build confidence in their testing abilities.

Ensure CAHSEE Success

Extensive reporting capabilities allow teachers and administrators to track student achievement and make educational decisions based on real-time student progress data. Likewise, instructional management capabilities enable educators to configure the digital learning environment according to individual classroom and student needs.

Flexible Usage Options

Linear Approach. Students work through the Apex Learning CAHSEE Exam Prep courses sequentially, practicing all content standards tested on the CAHSEE and receiving instructional feedback.

Diagnostic Approach. Students follow the individualized study plans generated by the diagnostic pretest to practice skills and concepts on the CAHSEE that have not been previously mastered.

Teacher-Directed Approach. Teachers use results from the diagnostic pretest or another assessment to provide targeted remediation and instructional feedback using Apex Learning Exam Prep.
